

ADDITION FACTS

Doubles & Sums to 20

Objective: Add small numbers. Learn your doubles so you just know them.

INSTRUCTION

Count both groups, then write how many in all. Learn your doubles so you just know them!

EXAMPLE

A double is a number added to itself.

$$3 + 3 = 6$$

$$5 + 2 = 7$$

$$4 + 4 = 8$$

INDEPENDENT PRACTICE

Write each sum. Watch for your doubles!

1. $1 + 1 = \square$

2. $2 + 2 = \square$

3. $3 + 3 = \square$

4. $4 + 4 = \square$

5. $5 + 5 = \square$

6. $6 + 6 = \square$

7. $7 + 7 = \square$

8. $8 + 8 = \square$

9. $9 + 9 = \square$

10. $10 + 10 = \square$

11. $2 + 5 = \square$

12. $10 + 3 = \square$

13. $10 + 6 = \square$

14. $9 + 6 = \square$

15. $2 + 6 = \square$

16. $4 + 5 = \square$

17. $9 + 4 = \square$

18. $4 + 7 = \square$

19. $7 + 3 = \square$

20. $1 + 7 = \square$

21. $6 + 8 = \square$

22. $7 + 10 = \square$

23. $5 + 10 = \square$

24. $10 + 1 = \square$

25. $10 + 4 = \square$

26. $3 + 7 = \square$

27. $10 + 7 = \square$

28. $4 + 1 = \square$

29. $1 + 4 = \square$

30. $4 + 9 = \square$

I solved by: ☐ counted on ☐ knew my double ☐ used a ten frame
