► Read the passage carefully.

READ · read carefully — you will answer questions about this

Bees work together to make honey. They visit many flowers and drink the sweet juice. They bring it home to their hive. Inside the hive, bees pass the juice from bee to bee. They mix it with special powder from flowers. Then bees fan their wings very fast. The juice becomes thick and golden. When it is ready, bees seal it in small rooms. Now they have honey to eat all winter long.
