

ADDITION FACTS

Doubles & Sums to 10

Objective: Add small numbers. Learn your doubles so you just know them.

INSTRUCTION

Count both groups, then write how many in all. Learn your doubles so you just know them!

EXAMPLE

A double is a number added to itself.

$$3 + 3 = 6$$

$$5 + 2 = 7$$

$$4 + 4 = 8$$

INDEPENDENT PRACTICE

Write each sum. Watch for your doubles!

1. $1 + 1 = \square$

2. $2 + 2 = \square$

3. $3 + 3 = \square$

4. $4 + 4 = \square$

5. $5 + 5 = \square$

6. $1 + 2 = \square$

7. $5 + 2 = \square$

8. $5 + 4 = \square$

9. $2 + 8 = \square$

10. $1 + 5 = \square$

11. $1 + 9 = \square$

12. $9 + 1 = \square$

13. $1 + 8 = \square$

14. $7 + 3 = \square$

15. $6 + 3 = \square$

16. $2 + 4 = \square$

17. $4 + 3 = \square$

18. $8 + 1 = \square$

19. $6 + 4 = \square$

20. $3 + 5 = \square$

21. $4 + 5 = \square$

22. $1 + 3 = \square$

23. $4 + 2 = \square$

24. $8 + 2 = \square$

I solved by: ☐ counted on ☐ knew my double ☐ used a ten frame
