

FRACTIONS AT WORK

MIXED NUMBERS • TIMES A WHOLE

1 Remember

Show your work with a model.

$$\frac{\boxed{3}}{\boxed{4}} \times \boxed{4} = \boxed{3} \frac{\boxed{}}{\boxed{}}$$

2 Practice

$$\boxed{3} \frac{\boxed{4}}{\boxed{5}} + \boxed{1} \frac{\boxed{3}}{\boxed{5}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{3} \frac{\boxed{3}}{\boxed{5}} - \boxed{1} \frac{\boxed{2}}{\boxed{5}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\frac{\boxed{2}}{\boxed{3}} \times \boxed{5} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{5} \frac{\boxed{1}}{\boxed{6}} - \boxed{1} \frac{\boxed{1}}{\boxed{6}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{6} \times \frac{\boxed{2}}{\boxed{3}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{1} \frac{\boxed{3}}{\boxed{5}} + \boxed{1} \frac{\boxed{4}}{\boxed{5}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\frac{\boxed{1}}{\boxed{3}} \times \boxed{4} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{5} \times \frac{\boxed{1}}{\boxed{4}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

3 Model it

$$\boxed{1} \frac{\boxed{1}}{\boxed{4}} + \frac{\boxed{3}}{\boxed{4}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{3} \times \frac{\boxed{5}}{\boxed{8}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

4 Story

A rope was $3\frac{2}{3}$ yards long. Silas cut off $1\frac{1}{3}$ yards. How many yards of rope are left?

Answer: _____

The LORD is
good to all.
Psalm 145:9
