

RELATIONAL SUBTRACTION

Fluency • Related Subtraction Facts

Objective: *Build quick, accurate recall using related facts.*

DO THIS Complete each set of related facts. Look for the pattern.

STRATEGY Notice how related facts connect.

STRATEGY Same whole → as the part grows, the difference shrinks.

$$10 - 3 = \underline{7} \quad 10 - 4 = \underline{6}$$

FACT SETS Complete each set of related facts.

Whole = 19

$19 - 4 = \square$

$19 - 9 = \square$

$19 - 10 = \square$

$19 - 16 = \square$

Whole = 18

$18 - 1 = \square$

$18 - 2 = \square$

$18 - 15 = \square$

$18 - 17 = \square$

Whole = 14

$14 - 1 = \square$

$14 - 8 = \square$

$14 - 10 = \square$

$14 - 13 = \square$

What stayed the same? the whole the part the difference

ACCURACY CHECK Record how you did.

Correct: Corrected: Strategy used: _____

Objective: *Build quick, accurate recall using related facts.*

DO THIS Complete each set of related facts. Look for the pattern.

STRATEGY Notice how related facts connect.

STRATEGY Same whole → as the part grows, the difference shrinks.

$$10 - 3 = \underline{7} \quad 10 - 4 = \underline{6}$$

FACT SETS Complete each set of related facts.

Whole = 19

$19 - 4 = \underline{15}$

$19 - 9 = \underline{10}$

$19 - 10 = \underline{9}$

$19 - 16 = \underline{3}$

Whole = 18

$18 - 1 = \underline{17}$

$18 - 2 = \underline{16}$

$18 - 15 = \underline{3}$

$18 - 17 = \underline{1}$

Whole = 14

$14 - 1 = \underline{13}$

$14 - 8 = \underline{6}$

$14 - 10 = \underline{4}$

$14 - 13 = \underline{1}$

TEACHER NOTES Answer key & guidance

Answers: see grid

Common error: Random recall instead of using a related fact

Strategy: Group by shared whole; use known facts

Prompt: "Which fact do you already know that helps?"

What stayed the same? the whole the part the difference

ACCURACY CHECK Record how you did.

Correct: Corrected: Strategy used: _____
