

## RELATIONAL SUBTRACTION

Practice • Guided to Independent

Objective: *Practice the subtraction you have learned, with support that fades.*

**DO THIS** Work down the page. Each row gives a little less help.

**WORKED REMINDER** A quick reminder, not a new lesson.

**REMINDER**  $12 - 5 = \underline{7}$   
5 to 10 is 5, 10 to 12 is 2 → 7

**GUIDED ROW** Use the hint to help you.

1  $94 - 63 = \square$   
 $63 + \square = 94$

2  $45 - 33 = \square$   
 $33 + \square = 45$

**TRANSITIONAL ROW** Less help this time.

1  $66 - 20 = \square$

2  $73 - \square = 48$

**INDEPENDENT PRACTICE** Solve on your own.

1  $8178 - 5076 = \square$

2  $5805 - \square = 3412$

3  $\square - 5198 = 3651$

4  $7123 - 4306 = \square$

5  $9686 - \square = 8576$

6  $\square - 2233 = 5365$

7  $8853 - 3694 = \square$

8  $9827 - \square = \square$

9  $\square - 6905 = 2019$

10  $7731 - 3907 = \square$

11  $7353 - \square = 4984$

12  $\square - 101 = \square$

13  $8313 - 6640 = \square$

14  $4090 - \square = 1890$

**PROVE IT** Solve and check one with addition.

1  $58 - 5 = \square$   
 $5 + \square = 58$

2  $52 - 6 = \square$   
 $6 + \square = 52$

How did it go:  easy  getting there  need more practice

## RELATIONAL SUBTRACTION

Practice • Guided to Independent

Objective: *Practice the subtraction you have learned, with support that fades.*

**DO THIS** Work down the page. Each row gives a little less help.

**WORKED REMINDER** A quick reminder, not a new lesson.

**REMINDER**  $12 - 5 = \underline{7}$   
5 to 10 is 5, 10 to 12 is 2 → 7

**GUIDED ROW** Use the hint to help you.

1  $94 - 63 = \underline{31}$   
 $63 + \square = 94$

2  $45 - 33 = \underline{12}$   
 $33 + \square = 45$

**TRANSITIONAL ROW** Less help this time.

1  $66 - 20 = \underline{46}$

2  $73 - \underline{25} = 48$

**INDEPENDENT PRACTICE** Solve on your own.

1  $8178 - 5076 = \underline{3102}$

2  $5805 - \underline{2393} = 3412$

3  $\underline{8849} - 5198 = 3651$

4  $7123 - 4306 = \underline{2}$

5  $9686 - \underline{1110} = 8576$

6  $\underline{7598} - 2233 = 5365$

7  $8853 - 3694 = \underline{5159}$

8  $9827 - \underline{2510} = 7$

9  $\underline{8924} - 6905 = 2019$

10  $7731 - 3907 = \underline{3824}$

11  $7353 - \underline{2369} = 4984$

12  $\underline{7890} - 101 = 77$

13  $8313 - 6640 = \underline{1673}$

14  $4090 - \underline{2200} = 1890$

**PROVE IT** Solve and check one with addition.

1  $58 - 5 = \underline{53}$   
 $5 + \underline{53} = 58$

2  $52 - 6 = \underline{46}$   
 $6 + \underline{46} = 52$

**TEACHER NOTES** Answer key & guidance

Answers: 3102, 2393, 8849, 2817, 1110, 7598, 5159, 2510, 8924, 3824  
Common error: Reverting to counting all instead of counting up

Strategy: Fade support: hint → none  
Prompt: "Which step did the hint replace?"

How did it go:  easy  getting there  need more practice
