

# WHEN ONES MAKE A TEN

## MAKE A TEN • ADD • REGROUP

Trade 10 ones for 1 ten.

**1 Remember** Use the place-value chart and number bond to show how 10 ones can be traded for 1 ten.

| Tens                                                                              | Ones                                                                              |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
|  |  |

**Tip:**

$$62 + 9: 2 + 9 = 11 \text{ ones.}$$

$$10 \text{ ones} = 1 \text{ ten, so } 62 + 9 = 71.$$

**2 Build the ten** Make a ten to help you add. Use the ten-frame to show the ones.

a.  $75 + \square = \square$  

b.  $86 + \square = \square$  

c.  $24 + \square = \square$  

d.  $29 + \square = \square$  

**3 Solve** Find the sum. Use the place-value chart to show your work if needed.

a.  $39 + 43 = \square$ 

| Tens | Ones |
|------|------|
|      |      |

d.  $46 + 29 = \square$ 

| Tens | Ones |
|------|------|
|      |      |

b.  $26 + 44 = \square$ 

| Tens | Ones |
|------|------|
|      |      |

e.  $18 + 27 = \square$ 

| Tens | Ones |
|------|------|
|      |      |

c.  $21 + 19 = \square$ 

| Tens | Ones |
|------|------|
|      |      |

f.  $33 + 29 = \square$ 

| Tens | Ones |
|------|------|
|      |      |

**4 Story problem** Read and solve. Use the space to draw or model with tens and ones.

Joseph stored 38 baskets of grain in one barn and 14 baskets in another. How many baskets did he store in all?

Answer: \_\_\_\_\_
