

When Ones Make a Ten

Ten ones can trade for one ten.

1 Look at the thinking

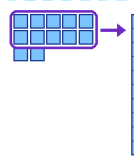

1 Line up the places

	T	O
	¹ 1	9
+	2	3
	4	2

2 Add the ones

$$9 + 3 = 12 \text{ ones}$$

3 Make the trade

$$12 \text{ ones} = 1 \text{ ten and } 2 \text{ ones}$$

4 Finish

$$1 + 2 + 1 = 4 \text{ tens}$$

$$19 + 23 = 42$$

2 Talk about it

Why can't two digits stay in the ones place?

What did we trade?

Where does the carried 1 go?

Does our answer make sense?

3 Try one

a

	T	O
	2	8
+	2	6

b

	T	O
	1	5
+	1	9

c

	T	O
	2	5
+	5	9

4 Write it

a _____ = _____ tens + _____ ones

b _____ = _____ tens + _____ ones

c _____ = _____ tens + _____ ones
