

# DIVISION

## Equal Groups

**Objective:** Share a group into equal parts, then count how many are in each group.

### INSTRUCTION

Share the dots into equal groups, then count how many are in each group.

### EXAMPLE

Follow the steps to solve it.

$$8 \div 4 = 2$$

*Share equally.* Put 8 dots into 4 equal groups, then count how many are in each group. Each group has 2.

### INDEPENDENT PRACTICE

Share each group equally. Write how many are in each group.

$$12 \div 3 = \underline{\quad}$$

$$20 \div 4 = \underline{\quad}$$

$$10 \div 2 = \underline{\quad}$$

$$9 \div 3 = \underline{\quad}$$

$$4 \div 2 = \underline{\quad}$$

$$12 \div 4 = \underline{\quad}$$

$$6 \div 2 = \underline{\quad}$$

$$16 \div 4 = \underline{\quad}$$

$$8 \div 2 = \underline{\quad}$$

$$18 \div 3 = \underline{\quad}$$

$$8 \div 4 = \underline{\quad}$$

$$12 \div 2 = \underline{\quad}$$

I solved by:  made equal groups  counted each group  checked my count
