

Creation Observation Walk

Look for and observe:

1. A repeating pattern

2. Three different natural colors

3. Something symmetrical

4. A sign of new growth

5. Something fully grown

6. A leaf or flower bud

7. Something that provides shelter

8. Something that provides food

9. A sign of seed dispersal

10. Something tiny with beautiful detail

11. Something soft

12. Something rough

13. Something that points upward

14. Something that spreads outward

15. A sign that water helps life grow

16. Something that reflects sunlight

17. A shape you can name

18. Evidence of order or design

19. A sign of God's provision in nature

20. Something that makes you stop and wonder

Observe only. Do not collect nests, eggs,
living insects, mushrooms, or unknown plants.

Creation Observation Companion Activities

After your walk, respond in these ways:

1 Nature Journal

Write 3 to 5 things you noticed.

2 Sketch What You Saw

Draw one part of creation carefully.

3 Color Sort

Group what you observed by color.

4 Shape Hunt Review

Sort what you saw by shape.

5 Symmetry Check

Draw or list things that show symmetry.

6 Growth Notes

Write about a sign of growth you found.

7 Shelter and Provision

Identify what gives shelter or food.

8 Classify Your Observations

Sort them by living, nonliving, plant, or animal sign.

9 Compare Two Things

Tell how two items are alike and different.

10 Detail Labeling

Sketch one object and label its parts.

11 Creation Reflection

Write 2 to 4 sentences about what you learned from God's creation.

12 Thankfulness Response

Write one sentence thanking God for what you observed.
