

Meadow and Pollinator Hunt

Look for and observe:

1. A bright flower

2. A flower with a strong scent

3. A flower with a round center

4. A flower with long petals

5. A cluster of small flowers

6. A butterfly

7. A bee

8. Another helpful insect

9. A flower bud

10. A flower fully open

11. A seed head

12. Pollen on a flower

13. A pollinator landing on a flower

14. A pollinator flying from flower to flower

15. A flower with stripes or markings

16. A plant swaying in the breeze

17. A tall meadow grass

18. A color that stands out in the meadow

19. Evidence that plants are making seeds

20. Something that makes you stop and wonder about God's creation in the meadow

Observe only. Do not catch insects or pick flowers. Watch pollinators gently and keep a respectful distance.

Meadow and Pollinator

COMPANION ACTIVITIES

After your hunt, respond in these ways:

1 Pollinator Journal

Write 3 to 5 things you noticed.

2 Sketch a Flower

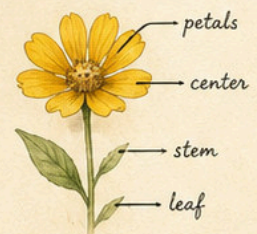

Draw one flower carefully.

3 Pollinator Observation Notes

Record what a bee, butterfly, or insect was doing.

4 Flower Diagram

Label petals, center, stem, and leaf.

5 Color Sort

Group flowers or petals by color.

6 Seed Head Study

Draw or describe a seed head.

7 Seed Dispersal Activity

Show how seeds can travel by wind or animals.

8 Paper Pollinator Craft

Make a simple paper butterfly or bee.

9 Meadow Match

Compare two flowers or two insects.

10 Pollination Path

Draw how a pollinator moves from flower to flower.

11 Creation Reflection

Write how pollinators help plants grow and reproduce.

12 Thankfulness Response

Write one sentence thanking God for flowers and pollinators.
