

6 Garden & Homestead Projects

Useful natural-material builds for your yard and garden.

1 Grapevine Garden Trellis

Shape wild grapevine into a sturdy support for climbing plants.

Found Materials:
Wild grapevine, woody stakes.

Use:
For beans, peas, cucumbers, or flowering vines.

2 Bean Pole Teepee

Lash long saplings into a cone trellis for garden crops.

Found Materials:
Straight saplings, cordage.

Use:
For pole beans, peas, or cucumbers.

3 Wattle Fence Panel

Weave flexible branches between upright stakes to make a durable panel.

Found Materials:
Willow or hazel rods, stakes.

Use:
For fencing, windbreaks, or garden partitions.

4 Brushwood Compost Bin

Stack and weave sticks around corner posts to form a compost bin.

Found Materials:
Branches, brush, stakes.

Use:
For holding leaves, weeds, and compost materials.

5 Sapling Tool Rack

Lash saplings into a simple standing rack for hanging hand tools.

Found Materials:
Straight saplings, cordage.

Use:
For shovels, rakes, hoes, or garden tools.

6 Willow Garden Obelisk

Weave willow rods into a tall tapered support.

Found Materials:
Willow rods, stakes.

Use:
For climbing flowers, beans, or peas.
