

6 Nature & Wildlife Projects

Helpful natural-material builds for habitat, learning, and caring for outdoor spaces.

1 Hollow-Log Bee Hotel

Provide a safe nesting place for solitary bees and other beneficial pollinators.

Found Materials:
Hollow log, bamboo stems, dead twigs, pinecones, and leaves.

Use:
Attracts pollinators to support garden growth.

2 Stone Bird Bath

Create a simple water source for birds and beneficial insects to drink and bathe.

Found Materials:
Flat stones, small rocks, pebbles, and water.

Use:
Provides hydration and supports local wildlife.

3 Shadow-Stick Sundial

Make a working sundial to learn about the sun's path and time outdoors.

Found Materials:
Straight stick, flat stone or bare soil, small rocks or chalk.

Use:
Teaches time, shadows, and earth science.

4 Twig Cloche Frame

Protect tender plants from frost and pests with a natural mini-greenhouse frame.

Found Materials:
Flexible branches, twine or vines, and small stakes.

Use:
Extends the growing season and shields young plants.

5 Brushwood Toad Shelter

Build a cool, damp hideout to give toads a safe place to rest and overwinter.

Found Materials:
Sticks, leaves, logs, rocks, and moss.

Use:
Supports amphibians and balances the ecosystem.

6 Branch Seed-Drying Hanger

Dry seeds and seed heads naturally for storage, study, or future planting.

Found Materials:
Tree branch, twine, clothespins or knots, and seed heads.

Use:
Saves seeds and teaches plant life cycles.
