

Fluency

root logy

Do this

Read the passage three times: carefully, smoothly, like talking. Tick a box each time. Read the words over each scoop together.

A Different Kind of Study

- 1 The mission map showed a town beside a wide river. Mrs. Lane asked us to study it from different angles. Biology helped us think about living things near the river: fish, reeds, insects, and people who needed clean water. Geology helped us notice the rock ledge that made one bank higher than the other.
- 2 Then we met the word theology. The root logy means study of, and theology is the study of God and His truth. We did not try to turn the map into a sermon. Instead, we asked how truthful study could lead to humble service. If people need water, a bridge, or a safe road, neighbors should notice real needs and respond wisely.
- 3 I wrote three logy words in my notebook and explained each one. Biology studies life. Geology studies earth. Theology studies God and His truth.
- 4 The passage helped me see that one place can be studied in different ways, but every careful study should honor truth.
