

Completing a whole number (mixed numbers)

Find the missing fraction:

1) $3\frac{1}{3} + \underline{\hspace{2cm}} = 6$

2) $2\frac{11}{12} + \underline{\hspace{2cm}} = 4$

3) $2\frac{1}{2} + \underline{\hspace{2cm}} = 4$

4) $1\frac{1}{3} + \underline{\hspace{2cm}} = 5$

5) $1\frac{5}{6} + \underline{\hspace{2cm}} = 3$

6) $3\frac{6}{8} + \underline{\hspace{2cm}} = 5$

7) $3\frac{1}{4} + \underline{\hspace{2cm}} = 6$

8) $4\frac{1}{2} + \underline{\hspace{2cm}} = 10$

9) $2\frac{1}{4} + \underline{\hspace{2cm}} = 9$

10) $6\frac{1}{3} + \underline{\hspace{2cm}} = 14$

11) $5\frac{1}{3} + \underline{\hspace{2cm}} = 8$

12) $4\frac{4}{8} + \underline{\hspace{2cm}} = 9$

13) $5\frac{2}{3} + \underline{\hspace{2cm}} = 9$

14) $5\frac{5}{6} + \underline{\hspace{2cm}} = 7$

15) $4\frac{5}{6} + \underline{\hspace{2cm}} = 7$

16) $1\frac{4}{11} + \underline{\hspace{2cm}} = 4$
