

### Mixed word problems

Liam was sick last Friday.

1. He usually gets up at 7:35 a.m. Since he was sick, he got up 1 hour and 35 minutes later than usual. What time did he get up?
2. He has some pain killers at home for his headache and fever. There are 36 tablets left in the bottle and he is supposed to take 2 tablets at a time, 4 times a day. How many tablets will be left after one day? How many days before he runs out of tablets?
3. Liam went to the doctor. There are 8 patients waiting. The nurse told him it will be his turn after 2 hours. How many minutes would the doctor use to see each patient?
