

The Work of Worms

Read the short passage then answer the questions below.

Earthworms live in dark soil where few people notice them. As they move, they loosen the ground and leave nutrients behind. Healthy soil helps roots grow deep and strong. The more carefully people study creation, the more order and beauty they notice. God's creation is full of hidden helpers. That is one reason nature invites both observation and praise.

1. What natural thing does the passage describe?

2. What key detail explains how it works?

3. What result or pattern does the passage show?

4. What faith idea is connected to the topic?
