

### Shopping word problems

Using the below item prices, solve the equations.

shirt = \$8.38

hat = \$12.47

tie = \$6.11

belt = \$7.13

pair of socks = \$4.74

jacket = \$33.04

sweater = \$26.75

pair of pants = \$31.62

- \_\_\_\_\_ Sandra purchases a sweater and a tie. If she had \$40.00, how much money will she have left?
- \_\_\_\_\_ What is the total cost of a hat?
- \_\_\_\_\_ Michele purchases a pair of pants and two hats. If she had \$70.00, how much money will she have left?
- \_\_\_\_\_ Donald purchases two ties and a pair of socks. If he had \$30.00, how much money will he have left?
- \_\_\_\_\_ What is the total of two ties?
- \_\_\_\_\_ Paul purchases a pair of socks, a belt, and two jackets. How much change will he get back from \$90.00?
