

Measuring weights, precision & errors

Grade 5 Measurement Worksheet

<p>Scale A</p>  <p>How heavy is the watermelon? _____</p>	<p>Scale B</p>  <p>How heavy is the watermelon? _____</p>
---	--

1. Which scale is more precise, A or B? Why?

2. Are your measurements exact? Explain.

3. Jeremy measured the weight of the luggage for his travel. He recorded the weight as 3,520 +/- 25 g. Why do you think Jeremy recorded the weight like that?

4. What do you think the minimum weight of the luggage is?

5. What do you think the maximum weight of the luggage is?
