

Multiplying fractions by whole numbers

1. A professional miner can dig $\frac{3}{8}$ meter in an hour. How many meters can 8 professional miners dig in 2 hours?
2. It takes a week to build $\frac{3}{38}$ of a 2-storey house. How much of the house will be done after 8 weeks?
3. A gallon of paint can cover $\frac{2}{25}$ of the wall. How much of the wall will be painted if there were 5 gallons of paint?
