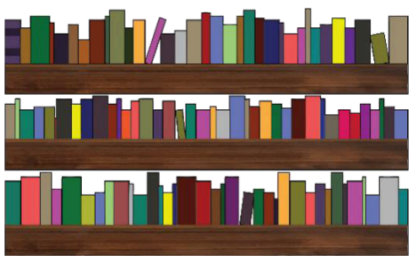
Name: _____

Writing and comparing fractions

On Ashley's shelf, there are 25 chapter books, 23 picture books and 18 comic books. Among these books, 32 books are paperbacks, and the rest are hardcover books.

Ashely finished reading $\frac{9}{11}$ of the books.
$\frac{5}{66}$ of the books are gifts from her friends.
Ashley bought $\frac{5}{6}$ of the books.

1. What fraction of Ashley's books are picture books?

2. What fraction of the books are comic books?


3. What fraction of the books are paperbacks?
